EXPAND BUILDING MATERIALS MANUFACTURE

IMPROVE CLAY-CONSTRUCTION METHOD -- Berlin, Taegliche Rundschau, 13 Jun 51

Dr Keil (fnu) of Quedlinburg has devised a new method for clay construction work. The invention, on which a patent is pending, will make it possible to use rapidly hardening clay that can be poured, even for the foundations and the basements, which up to now had to be built of bricks or natural stone. The new process will make winter construction feasible.

Dr Engelbrecht (fnu), Magdesburg, is working on the improvement of the clay-construction method for quicker drying by the use of electrodes. The State Bureau for Testing Building Materials and the research laboratory for building materials of the Academy of Architecture in Weimar are working in close cooperation with the government's consulting office for the improvement of the clay-construction method.

GLASS PRODUCTS RECEIVE QUALITY EMBLEM -- Berlin, Nachrichten fuer Aussenhandel, 3 Feb 51

Up to now, 100 glass products of the Baerenhuetten plant, a subsidiary of the VVB Ostglas in Weisswasser, have been awarded the quality emblem by the Land Sachsen Committee for Arts and Crafts. Seventy-five percent of the products of the Oberlausitz Glassworks have also been awarded the emblem.

MASS-PRODUCES AEROTECHNICAL EQUIPMENT -- Berlin, Nachrichten fuer Aussenhandel, 20 Dec 50

The people-owned Aerotechnical Equipment Plant in Berlin, will start mass production of ventilators, heating appliances, and filters in 1951. A new shop is to be built and the one currently in use will be equipped with new machines and lifting installations.
